Continuation of 2. NOTE: Proposed new limitations to base claim 2 wherein "the twist angle and the (delta)nd value of the twisted retardation film are smaller than that of the super twisted nematic liquid crystal cell" require further consideration and search.

Continuation of 5. does NOT place the application in condition for allowance because: It is respectfully pointed out that Applicant argues differences between Applicant's claimed invention and the applied prior art. However, specific differences that might have support in the Specification are not present in the claims in sufficiently narrow form to overcome the applied prior art. Specifically, Applicant's claims to the nature of the viewing angle improvement, reflection light increasing means, metallic silver background, etc. are not narrowly defined in the Specification and are not present in the claims in sufficiently narrow form. Examiner cannot presently confirm the existance of allowable subject matter due to the broad nature of present claims.
